

BrickBuddy - Master Requirements Document

Construction Management SaaS Platform

Project Vision

BrickBuddy is a construction technology platform designed to help remote property owners, contractors, vendors, laborers, and construction companies collaborate through a single digital ecosystem.

Module 1: Project Monitoring System

- Client, Contractor, Supervisor and Admin roles
- Project dashboards and progress tracking
- Daily site logs and updates
- Photo, video and document uploads
- Daily, weekly and monthly reports
- Notifications and alerts

Module 2: Vendor & Material Marketplace

- Vendor registration and dashboards
- Material listings (cement, steel, sand, bricks, tiles, etc.)
- Inventory and pricing management
- Regional pricing support
- Featured vendor promotions

Module 3: Lead Generation System

- Construction company profiles
- Project lead submissions
- Lead management dashboard
- Analytics and conversion tracking

Module 4: Labor Marketplace

- Mason, plumber, electrician, carpenter and other skilled labor profiles
- Skill-based hiring
- Location-based search
- Reviews and ratings
- Availability calendar

Module 5: Admin Panel

- User management
- Vendor approvals
- Labor verification
- Project oversight
- CMS management

Module 6: Analytics & Reporting

- Project progress analytics
- Vendor performance metrics
- Lead conversion reports
- Labor marketplace analytics

Future Enhancements

- AI-based budgeting and forecasting
- WhatsApp integration
- Android and iOS applications
- IoT and CCTV integrations
